

IV DRIP THERAPY

Intravenous therapy is a highly efficient effective way to deliver nutrients directly into your bloodstream for rapid hydration and maximum absorption. Our signature IV therapies blend the essential vitamins, minerals, amino acids, and antioxidants required to treat a range of needs, and are administered by our trained medical specialists.

IMMUNE BOOSTER | 30-60 min | THB 4,500

Rich in vitamins and minerals, making it an ideal solution for individuals suffering from fatigue, unhealthy lifestyles, malnutrition, and sleep deprivation. This program provides high doses of vitamin C and other essential nutrients to help boost your immune system and support your overall health.

NAD IV TREATMENT | 90-120 min | THB 9,600

NAD IV Treatment therapy specially designed to help you feel and look more energetic. The perfect mix of natural antioxidants and fluids containing essential nutrients can help boost Nicotinamide Adenine Dinucleotide (NAD+) levels that regulate metabolism and improve mitochondria function – a decrease in this function is a cause of ageing. This helps slow or reverse the ageing process.

ANTI-AGEING | 60 min | THB 6,600

Rich in essential amino acids, which are needed for cellular repair and regeneration, this therapy also contains amino acid derivatives to stimulate glutathione production and metabolism which supports body repair on tissue damage. These essential amino acids, those that the body can't make and non-essential amino acids that the body can create, help the body repair worn parts, build muscle, hormones, and antioxidants.

HANGOVER REMEDY (DETOX) | 60-120 min | THB 3,400

Bounce back quickly with a remedy formulated with vitamins, minerals, and amino acids to increase liver alcohol elimination, replenish essential vitamins that may be lost after drinking, rehydrate the body, and speed up recovery.

ANTIOXIDANT | 60 min | THB 5,400

Fortify your free radical defence with this formula of super antioxidants which are used to break down carbohydrates and sugars to increase your cellular energy. This therapy supports sugar control, the body's fight against free radicals, and inflammation, each a cause of cellular ageing.

ENERGY BOOSTER | 60 min | THB 5,400

Specially formulated to help ease symptoms of fatigue and boost energy. Amino acids such as L-Carnitine can help with muscle weakness and cardiovascular health, as well as accelerating your metabolism, helping you burn more calories and enhancing your athletic performance. If you are tired following a workout at the gym or a long day at work, this energy booster drip is just for you. It's also ideal for sports enthusiasts and athletes who want to perform better and have more energy.

METABOLISM BOOSTER | 60 min | THB 3,400

Contains amino acid derivatives that signal your body to utilise and burn more fat for energy. Together with essential vitamins for energy production, this blend helps increase your power during exercise and supports weight control reducing your excess fat.

BEAUTY BOOSTER | 40 min | THB 3,400

Nourishing from the cellular level to the skin, this multi-vitamin formula is designed to replenish your body with concentrated vitamins to support collagen production and skin radiance. It also contains amino acids that increase glutathione, a powerful antioxidant protecting your skin from free radicals, adjusting and brightening your skin from the inside out.

IV JET LAG | 60 min | THB 3,400

Jet lag symptoms are temporary but can be highly disruptive for the first few days of your trip or upon returning home. The air pressure and lower oxygen levels at high altitudes on the plane, combined with the crossing of multiple time zones, can lead to dehydration, headaches, dizziness, fatigue, brain fog, insomnia, and daytime drowsiness. Rehydrating your body after a long flight is essential to relieving jet lag symptoms. This IV therapy blends fluids, anti-inflammatories, antioxidants, vitamin B12, and other vitamins your body needs to re-energize. You do not have to wait until after you land to get the benefits of IV therapy though. In fact, taking the infusion before your flight may help minimize or even prevent many jet lag symptoms.
